

Bacteria, Mould & Mildew Control

Producter

Imagine a spray so cleverly engineered it targets and destroys the soft celled structures of mould, mildew, fungus and bacteria. Yet is completely harmless to the solid cells of plants, animals and people.

Imagine a spray so powerful that it has a kill rate of 99.99% on contact, yet has no withholding period.

Imagine a spray so powerful that your pathogen load is eliminated within the hour, yet it doesn't harm delicate maidenhair fern, even at full strength.

Imagine a spray powerful enough to pass the stringent requirements of AQIS, (Aust' Quarantine Inspection Service) yet safe enough to gain clearance from NASAA. National Association for Sustainable Agriculture Australia

Imagine a spray so powerful that it strengthens the outer cell wall structure, returning that lettuce leaf crispness, making those post harvest details, a snap.

Imagine a spray with an in-built cleaner and antioxidant that clears away all previous sprays and removes the free radicals.

Imagine a spray containing no chemicals. That you can spray safely around fishponds, aviaries, reptile enclosures etc

Imagine a spray that extends shelf life, in crispness, texture and colour.

Imagine the security of knowing that MICRO KILL is actively securing your crop for the next 2 weeks

Microkill

*"Broad
Spectrum
Bactericide
Fungicide
Contact Spray"*

*"Kills Bacteria,
Mould Mildew
and Fungus
...Fast"*

Even Maidenhair fern is unaffected after application of Microkill at double

New Product

Micro Kill is a new food grade, non-toxic, non-rinse, food and water biocide and sanitiser

Biological Protection

The unique organic properties of Micro Kill allow it to actively protect plant, soil water and work surfaces.

Extends Shelf Life

Micro Kill will extend the shelf life and freshness of produce, in all stages of the production process.

Antibiotic Action

Micro Kill has a natural and totally safe antibiotic action, though it is not an antibiotic. It acts like traditional antibiotic when used with food additive for live animals, without the harmful side effects.

No Resistance

Bacteria cannot build up resistance to Micro Kill through mutation due to the unique way Micro Kill targets and destroys.

Odourless

Micro Kill is odourless, and almost tasteless when used at recommended dilutions.

Stores Well

Micro Kill does not taint and has a 2-year shelf life at room temperature.

Organically Safe

Micro Kill is completely organic and is HARMLESS TO HUMANS, ANIMALS AND THE ENVIRONMENT. Micro Kill is so safe it's CLASSIFIED AS A FOOD!.

Product History

MICRO KILL is a revolutionary new product with a kill rate chemicals haven't reach yet without side effect when used as recommended

How it Works

Micro Kill destroys mould, fungus and bacteria, and is completely safe to plants and animals. The natural organic sugars in Micro Kill are structured to combine with the plant to create a powerful long lasting effect. Micro Kill's organic action pierces, enters and destroys the cell structure of pathogens.
